## Dryer Balls

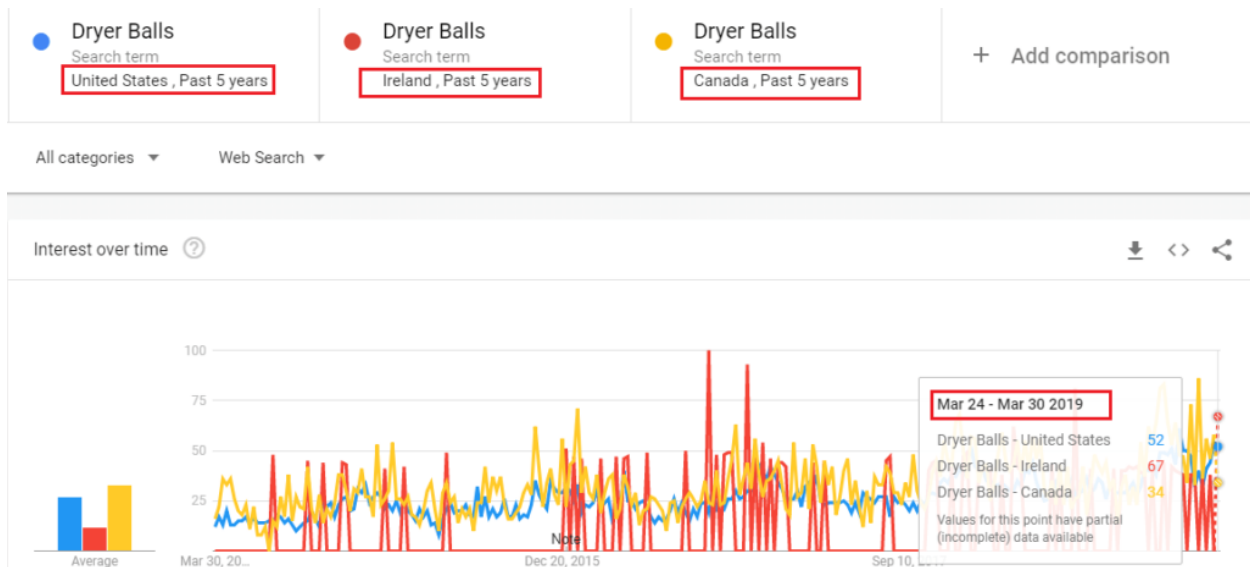

Dryer balls are made of fabric, rubber or plastic, and are used to quicken the process of drying. When you put a handful amount of clothes in the dryer, they tend to stick together and take time to dry.

To prevent them from clinging onto each other, dryer balls separate the clothes, allowing them to dry quicker.

The worldwide trend is showing a decline in the demand for dryer balls, however, regional trends are showing a different story.

United States and Ireland showing a rising trend for dryer balls whereas Canada is showing a downward trend.
